A free trade agreement is a pact between two or more nations to reduce barriers to imports and export among them. Under a free trade policy, goods and services can be bought and sold across international borders with little or no government tariffs, quotas, subsidies, or prohibitions to inhibit their exchange.

India has entered FTA with many countries in the recent past. This webinar has been designed to bring out the benefits for the Plastics Products exports to different countries under FTA. As exporters, most of us know about FTA's but we may not know how to derive the benefits through these agreements for our products.
